

PHASE 3 – PROJECT DESIGN

Proposed Solution

Field	Details
Team ID	6ab4c3e86603573ccfb5068c
Project Name	Auto Ticket Classification using Flow Designer
Platform	ServiceNow
Maximum Marks	4 Marks

1. Proposed Solution

The proposed solution is a ServiceNow Flow Designer automation that classifies a newly created school IT ticket by examining keywords in its Short Description. It updates Category and Subcategory, while dependent choices ensure that the selected subcategory belongs to the selected category.

2. Proposed Workflow

Create Ticket	→	Record Created	→	Keyword Check	→	Update Record	→	Send Email
---------------	---	----------------	---	---------------	---	---------------	---	------------

3. Classification Rules

Keyword / Condition	Category	Subcategory
Wi-Fi / Network	Network	Wi-Fi
Projector	Hardware	Projector
Password / Login	Access	Forgot Password
Slow / Hanging	Performance	Slow Computer

4. Main Flow Configuration

Configuration	Value
Flow Name	Auto Classify School IT Tickets
Application	Global
Trigger	Record Created
Table	Incident Workflow
Condition	Category is Empty
Input Field	Short Description
Action	Update Record
Notification Action	Send Email
Email Recipient	Caller → Email

5. Solution Features

- Automatic category and subcategory assignment.
- Dependent Category/Subcategory data model.
- No-code keyword classification using Flow Designer.
- Automatic caller email acknowledgement.
- Structured ticket storage and standardized State choices.
- Easy extension with additional conditions and categories.
